

## DIY Network screening of The Cabin on Bighorn Creek

The cabin on Bighorn Creek, in the Walker family for seven generations, was rotting towards oblivion, when patriarch Byron, his sons Andy and Victor, spouses, grandkids, and friends pitched in to rebuild completely the cabin, using original tools. The DIY Network sent a team comprising more than twenty professionals to record the rebuilding in the summer of 2017. On January 16, 2018, they held a screening at the Rock Rest Lodge in Golden. You can read about the project in the November 2017 [FENW newsletter](#).
